Sacha Walckhoff

The result of the recent partnership between designer Sacha Walckhoff (former creative consultant to the likes of Christian Lacroix and Kenzo) and esteemed French ferronniers Pouenat is the Fur Play collection. Each piece — a chair, a desk and a chest of drawers — juxtaposes the unlikely combination of fur and metal, and blends the geometric with the organic.

Foscarini

The most recent collaboration between the creative team at Diesel and Foscarini is the Glass Drop family. Made from mouth-blown chromed aluminium glass, the design was inspired by water droplets. The decorative mirror effect (seen on the silver-coloured table lamp and pendants at right in the image) vanishes once the lamp is switched on (seen on the gold-coloured lamps at left), revealing a warm golden light.
